CAMPUS TREE TRAIL

NATIVE TREE TRAIL

TREE TRAIL

This trail does not include every tree native to the British Isles, but it does contain around 20 native species, located in fairly close proximity to each other near to the centre of Campus West, thus making it reasonably easy to see a good selection of native trees, without taking up too much time and effort.

NATIVE TRAIL

Native trees

TREE 1:

Scot's Pine
(*Pinus sylvestris*)

LOCATION
Derwent

TREE 5:

Yew
(*Taxus baccata*)

LOCATION
Spring Lane
